Conforms to EN 716-2008

WARNING

Warning: Be aware of the risk of open fire and other sources of strong heat, such as electric bar fires, gas fires, etc. in the near vicinity of the cot.

Warning: Do not use the cot if any part is broken, torn or missing and use only spare parts approved by the manufacturer.

Warning: Do not leave anything in the cot or place the cot close to another product, which could provide a foothold or present a danger of suffocation or strangulation, e.g. strings, blind/curtain cords, etc.

Warning: Do not use more than one mattress in the cot.

If you leave your child unattended in the cot, always make sure dropside is in the highest position.

Thickness of the mattress shall be such that the internal height (surface of the mattress to the upper edge of the cot frame) is at least 500 mm. The cot end (A2) is marked with a small hole, the top of the mattress used should be below this mark. The length and width shall be such that the gap between the mattress and the sides and ends does not exceed 30 mm.

Before using the cot ensure all assembly fixings are properly tightened, and remember to regularly check that they remain so. Loose screws can pinch parts of the body or catch clothing (string or ribbons on dummies etc.), and present a danger of strangulation.

When the child is able to climb out of the cot, with the mattress base on it's lowest position and the dropside raised, the cot shall no longer be used for that child.

COT CARE

If possible, do not place your cot next to a radiator or hot air vent.

The use of abrasive cleaners is not recommended.

Simply wipe clean and buff with a soft dry cloth.

Careless handling or movement of wooden furniture can damage it.
